# Trails Around Town

Over 90 miles of trail are located within a 5-mile radius of Ketchum. For a recreation outing and stunning scenery they are unparalleled – from long views atop Bald Mountain to quaking aspen groves in Corral Creek. If solitude is what you are seeking, choose a trail further away from town.

Each spring the trails are temporarily closed due to wet conditions. Please respect all closures – your patience helps to keep the trails in good condition for all who follow. Leash your dogs at area trailheads and pick up and remove their trailside waste. Bring plenty of water.

Visit the Blaine County Recreation District’s Summer TrailLink site for current information about the trails, including trail descriptions and updates about which trails are open or closed.

The Oregon Gulch Trailhead is another good starting point for a number of routes. The first couple of miles along the Oregon Gulch Trail are quite mellow, so many enjoy it as a shorter and easier out-and-back trip. Saddle Trail also departs from the Oregon Gulch TH, and it can be used as an out-and-back with shadier, but steeper terrain, or as part of the longer and demanding Oregon Gulch Loop, which is popular with experienced mountain bikers.

Bald Mountain offers a variety of scenic trails that can be accessed from either of the mountain’s base areas, with the River Run base area offering access to the Sun Valley Resort’s lifts and other facilities designed to accommodate mountain trail users.

The Bald Mountain Trail is the most popular hiking trail on the mountain. The low end of the trail can be accessed from River Run, or people can take a lift up the mountain for a downhill hiking or biking experience. From the top, bike riders may descend on the dedicated system of downhill only mountain bike flow-trails available to them, or they can choose to go down one of the shared-use trails that are open to two-way foot and bike traffic.

The trails that descend off of the top of the mountain go around the perimeter of Baldy, known as the Perimeter Trail. The Cold Springs Trail goes around the southern flanks of the mountain. The Warm Springs Trail goes around the shadier, more treed northern side to reach the Warm Springs base area of the mountain. Perimeter Trail 328 is closed each year until July 1 to protect calving elk herds.

### GETTING THERE:

**River Run Base Area:** From Ketchum head west on Sun Valley Road and follow it as it curves left (south) to become 3rd Avenue. Follow this road down to the River Run base area parking lot.

**Warm Springs Base Area (Access to low end of Warm Springs Perimeter Trail 328):** From downtown Ketchum head north on Main Street/Hwy 75 and bear left at the fork onto Warm Springs Road. Follow Warm Springs Road for about 2.5 miles to Gates Road on the left. Turn left and follow the road down the hill and across the bridge to the Sun Valley Company’s gravel parking lot for the Warm Springs base area.
